

## Geopolitical Analysis

Contemporary international relations are characterised by an increasing complexity. The difficulty of apprehending the epoch in which we live in is due, among other factors, to the enlarged number of actors, rapid technological advances, geo-economic rivalries, identity conflicts, and the tensions caused by the contradictory processes of globalisation. As a result of this increased complexity, the capacity to carry out geopolitical analysis to examine the interactions between geographic, demographic, cultural, economic and strategic factors, alongside their relevant impacts on tensions, conflicts, trends and foreign policy decisions, becomes more relevant than ever in a wide variety of professional fields. The author uses an accessible language with the aim of presenting the geopolitical analysis method in a clear and explicit manner so to be accessible to the public at large.

Gyula Csurgai lives in Geneva (Switzerland). He obtained his doctorate at the University of Geneva and degrees in Political Science at the University of Concordia (Canada) and the Université de Toulouse (France). He has participated in several international research projects and has provided expertise to a number of international organisations and governments. He has published, as well, several books and articles in the fields of geopolitics, geoeconomics, and international relations. Mr. Csurgai teaches Geopolitics and Geoeconomics at the International University in Geneva.
